RISK DISCLOSURE :

Yuanta/P-shares Taiwan Top 50 ETF (H.K.) (the "Sub-Fund") is an index tracking ETF investing substantially all its assets in the Yuanta /P-shares Taiwan Top 50 ETF (the "Master Fund"), whose investment objective is to provide investment returns that, after expenses, closely link to or correspond to the performance of the FTSE TWSE Taiwan 50 Index (the "relevant underlying index").

- Prices of the Sub-Fund on The Stock Exchange of Hong Kong Limited are based on secondary market trading factors and may deviate significantly from the net asset value of the Sub-Fund.
- The Sub-Fund may be subject to greater tracking error against the relevant underlying index than typical exchange traded index funds due to the master-feeder structure and inability to hold the securities of the relevant underlying index directly and the difference between the net asset value of the Sub-Fund and that of the Master Fund.
- Given the net asset value of the Sub-Fund will be based upon the closing bid price of Master Fund units on The Taiwan Stock Exchange which may be different from the net asset value of the Master Fund units, the net asset value of the Sub-Fund may as a result deviate further from the performance of the relevant underlying index.
- Since fees are levied on both the Sub-Fund's and the Master Fund's levels, the costs of investing in the Sub-Fund will be higher than investing directly in the Master Fund.
- Unitholders of the Sub-Fund do not have any direct interests in Master Fund units and accordingly are not entitled to vote as a unitholder of the Master Fund at the unitholders' meeting of the Master Fund. The Sub-Fund will be the unitholder in the relevant Master Fund and the Manager will vote such Master Fund units without reference to the wishes of individual unitholders.
- The Master Fund has a more concentrated portfolio in Taiwan which is more susceptible to risks associated with single economic, market, political or regulatory occurrence.

Investment involves risks. Fund prices may go up as well as down and an investor may lose its entire investment. Investors should read the explanatory memorandum of the fund carefully. Past performance of the fund is not indicative of future performance. The net asset value of the fund may be volatile due to market factors and market fluctuation. Before entering into any transaction, you should take steps to ensure that you fully understand the possible risks and characteristics of the fund or should seek independent professional advice if necessary. Investor should not solely rely on this document to make any investment decision. This document has not been reviewed by the Securities and Futures Commission of Hong Kong.
