What is this product?

Yuanta/P-shares Taiwan Top 50 ETF (H.K.) (the “**Sub-Fund**”) is a sub-fund of Yuanta Tracker Fund (H.K.) Series (the “**Trust**”), an umbrella unit trust established under Hong Kong law. The units of the Sub-Fund are listed on The Stock Exchange of Hong Kong Limited (the “**SEHK**”). These units are traded on the SEHK like listed stocks.

Objectives and Investment Strategy

Objectives

The investment objective of the Sub-Fund is to provide investment results that, after expenses, closely linked to or correspond to the performance of the Index.

Strategy

* The ongoing charges figure is based on expenses for the year ended 31 December 2014. This figure may vary from year to year.

**This is the actual tracking difference of the last calendar year. Investors should refer to the ETF website for more up to date information on actual tracking difference.

The Sub-Fund is a feeder fund which will invest substantially all of its assets in the Yuanta/P-shares Taiwan Top 50 ETF (the “**MF**”). The MF is a passively-managed index-tracking exchange traded fund listed on The Stock Exchange of Taiwan (the “**TWSE**”). The MF is domiciled in Taiwan and its home regulator is The Taiwan Financial Supervisory Commission.

To achieve the investment objective, the Sub-Fund will aim at investing at least 90% of its assets in the MF. It may also invest up to 10% of its assets in index futures contracts, options on futures contracts, stock index options and cash, local currency and forward currency exchange contract that are intended to facilitate the Sub-Fund to achieve investment results that closely linked to or correspond to the performance of the Index as closely as possible, or for hedging purposes. The Manager will not use these instruments to leverage, or borrow against, the Sub-Fund’s securities holdings or for speculative purposes. The Sub-Fund will not enter into any repurchase agreement, stock lending transactions and other similar over-the-counter transactions.

Information of the MF

MF Manager

Yuanta Securities Investment Trust Co., Ltd.

Objective

The investment objective of the MF is to track the performance of the Index and is authorised by The Taiwan Financial Supervisory Commission.

Strategy

To achieve the investment objective, the MF will adopt a combination of (1) full replication, and (2) “optimisation” as explained below:

- (1) The MF will invest in substantially all the securities constituting the Index in substantially the same weightings as these securities have in the Index.
- (2) The MF will hold a representative sample of the securities in the Index, selected by the MF Manager using quantitative analytical models. The MF Manager seeks to construct the portfolio of the MF so that, in the aggregate, its capitalisation, industry and fundamental/ technical investment characteristics perform like those of the Index. The MF Manager will review the MF regularly and will adjust the MF’s portfolio, when necessary, to conform to changes in the composition of the Index.

Index

The Index is consisted of the 50 most highly capitalised blue chip stocks listed on the TWSE and represents nearly 70% of the Taiwanese market. It is a price return index which means that the net dividends of the securities of the Index are excluded.

The Index was launched on 29 October 2002.

The Index Provider is a joint venture between the TWSE and FTSE International Limited (“**FTSE**”). The Manager (or its Connected Persons) is independent of the TWSE and FTSE.

As of 13 Oct 2015, the 10 largest constituent stocks of the Index are as follows:

Index Constituent	Weighting in index
1 Taiwan Semiconductor Manufacturing Co., Ltd	25.33%
2 Hon Hai Precision Industry Co., Ltd	9.36%
3 MediaTek Inc	3.11%
4 Fubon Financial Holding Co., Ltd	2.92%
5 Formosa Plastics Corporation	2.91%
6 Chunghwa Telecom Co., Ltd	2.89%
7 Cathay Financial Holding Co., Ltd	2.82%
8 Nan Ya Plastics Corporation	2.82%
9 Delta Electronics Inc	2.55%
10 Formosa Chemicals & Fibre Corporation	2.50%

What are the key risks?

Investment involves risks. Please refer to the Explanatory Memorandum for details including the risk factors.

1. Investment risk

- The Sub-Fund is an investment fund. There is no guarantee of the repayment of principal. Therefore your investment in the Sub-Fund may suffer losses.

2. Concentration risk

- The Sub-Fund is subject to concentration risk as a result of tracking the performance of companies whose operations and business are primarily from a single region i.e. Taiwan.
- The Sub-Fund is likely to be more volatile than a broadly-based fund such as global or regional equity fund as it is more susceptible to fluctuation in value resulting from adverse conditions in that single region.

3. Risks relating to Taiwan

- Investment in the Sub-Fund is subject to the risks associated with investment in Taiwan markets which involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, economic, foreign exchange, currency repatriation and regulatory risks.

4. Derivatives risk

- The Sub-Fund may, subject to its investment restrictions, invest up to 10% of its assets in derivative

instruments to gain exposure to constituent securities of the Index.

- This means that the Sub-Fund is subject to counterparty risk and may suffer losses equal to the full value of the derivative instruments if the counterparty fails to perform its obligation under the derivative contract. Any loss would result in a reduction in the net asset value of the Sub-Fund (the “NAV”) and impair the abilities of the Sub-Fund to achieve its investment objective to track its Index.

5. Risk relating to the master-feeder fund structure

- The Sub-Fund may be subject to additional tracking error by virtue of its investments in the MF, which is valued as listed securities at official closing prices. The MF can potentially contribute to tracking error due to any premium or discount in the secondary market and the additional costs incurred at the MF level.
- The Sub-Fund may be adversely affected by the trading suspension of the MF.

6. Trading hour’s difference

- As the TWSE may be open when units in the Sub-Fund are not priced, the value of the securities in the Sub-Fund’s portfolio may change on days when investors will not be able to purchase or sell the Sub-Fund’s units.
- Furthermore, the market prices of underlying securities listed on the TWSE may not be available during part of all of the SEHK trading sessions due to trading hour differences which may result in the trading price of the Sub-Fund deviating away from the net asset value.

7. Foreign exchange risk

- The units of the Sub-Fund listed on the SEHK are traded in Hong Kong dollar but the Index is calculated in New Taiwan dollar and the investment portfolio of the Sub-Fund generally comprises investment domiciled in New Taiwan dollar. Accordingly, unitholders will be exposed to foreign exchange currency risks arising from the fluctuations of Hong Kong dollar and New Taiwan dollar.

8. Passive investments

- The Sub-Fund is not “actively managed” and therefore, when there is a decline in the Index, the Sub-Fund will also decrease in value.
- The Manager will not adopt any temporary defensive position against any market downturn. Investors may lose part or all of their investment.

9. Trading risk

- Generally, retail investors can only buy or sell units of the Sub-Fund on the SEHK. The trading price of the units on the SEHK is driven by market factors such as the demand and supply of the units. Therefore, the units may trade at a substantial premium or discount to the NAV.

10. Termination risk

- The Sub-Fund may be terminated early under certain circumstances, for example where the MF is terminated or if the size of the Sub-Fund falls below HK\$50 million. Investors should refer to the section “Termination of the Trust and/or Sub-Funds” in the Explanatory Memorandum for further details. Unitholders may suffer substantial loss in the event of the early termination of the Sub-Fund.

Past Performance Information

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Sub-Fund increased or decreased in value during the calendar year being shown. Performance data has been calculated in HKD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Sub-Fund launch date: 2009

Is there any guarantee?

The Sub-Fund does not have any guarantees. You may not get back the amount of money you invest.

What are the fees and charges?

Charges incurred when trading the Sub-Fund on SEHK

Fee	What you pay
Brokerage fee	Market rates
Transaction levy	0.0027% of the trading price
